ABOUT

Grand Voyager 40

LOCATION

La Spezia, Liguria, Italy

The GRAND VOYAGER is a full custom global explorer with interior & exterior design by Milan based Hot Lab. She features a full displacement steel hull, aluminum superstructure giving her a large volume 399 gross tons & impressive range of 4,000nm at 10 knots. 5 or 6 cabin layouts available. Hull currently inbuild.

Bult to commercial class & MCA compliant this is a true pedigree build that can be delivered in a very attractive 26 months time.

Being a full custom the GRAND VOYAGER is available with multiple different layouts as showcased in the general arrangments in the brochure. Clients have the opportunity to feature a full beam master cabin located forward on the main deck or chose the optional private owners deck on the upper level instead of the sky lounge (or both for a 6 cabin layout with 4 guest cabins located on the lower deck).

Her aysemetric design allows for maximum volume both on the upper deck and the main deck. Fold down balconies back aft compliment the center line jacuzzi that serves as a focal point while being surrounded by lounge areas and a massive aft deck. I absolutely love this space when the main salon aft deck & side doors are opened up - the entire deck flows together combining interior & exterior deck spaces into one.

Hot Lab has created a stunning profile with a strong plumb bow yet have softened the lines with curved features and hard top really pulling it all together into one fluid shape.

The hull is currently under construction and will reduce the delivery date making this project even more attractive to potential buyers.

Full specifications
