ABOUT

Project Metaverse

LOCATION

Seattle, Washington, United States

PROJECT METAVERSE is a collaboration between Greg C Marshall Design and Delta Marine Shipyard combining two of the best in their respected fields to build what is destined to be an iconic global explorer.

Expanding on the success of the 45m Big Fish, PROJECT METAVERSE features some amazing features that set her apart from other designs: large open beach club with multiple bathing platforms, crows nest viewing deck, glass bottom pool, tender garage forward, and a private full beam owner's suite complete with balconies on both the port & starboard sides one with a spa pool.

Every detail on this design has been well thought out and assures that each deck flows smoothly from bow to stern: crew can access each deck efficiently with minimal interruption to the owner & guest parties, crew can handle tender operations seamlessly.

This project is waiting for a buyer to be introduced so that we can customize the final details, interior decor package, and request any modifications to the build they feel are necessary for their requirements, lifestyle, and intended usage.

Considering this is a large volume 63m the project can either increase or decrease in size due to the clients requirements. Full custom by Greg Marshall at one of the premier shipyards in the world creates a world class pedigree new construction project.

Full specifications
