Overview

The Nauticks 62 EVITA presents a rare opportunity to acquire a newly built power catamaran with impressive interior volume, efficient cruising characteristics, and a layout tailored for extended voyages. With a 10.00-meter beam and a semi-displacement hull design, she delivers excellent stability at sea while providing living spaces typically found on significantly larger yachts.

Powered by twin YANMAR 440 HP diesel engines with shaft drives, EVITA cruises comfortably at 9.5 knots and reaches a tested maximum speed of 13.5 knots. A Lewmar bow thruster enhances maneuverability in marinas, while the Raymarine navigation package, including dual 16-inch Axiom displays, radar, GPS, fishfinder sonar, autopilot, VHF and CCTV monitoring, supports confident passagemaking.

Accommodation is arranged across seven en-suite cabins, including five guest cabins and dedicated crew accommodation. Every cabin benefits from a private bathroom fitted with electric TMC toilets, separate shower areas with teak grating, Corian countertops, and quality marine fixtures. The main deck features a bright salon with lounge seating, dining area, and a fully equipped galley designed for extended cruising and entertaining.

Outdoor living is a defining feature of EVITA. The expansive flybridge combines a helm station, large dining area, Jacuzzi, BBQ station, wet bar, refrigerator, ice maker, generous sunpad, and open-air social spaces with panoramic views. The aft area connects seamlessly to the hydraulic swim platform, creating easy access to the water and simplifying tender handling.

Built using advanced vacuum infusion construction methods and equipped with substantial tank capacities, air conditioning throughout, a watermaker, and comprehensive onboard systems, EVITA is prepared for comfortable cruising from day one.
